Böckmann RK-AL Tipper

£ 4,750

Plus VAT

The backwards tippers from Böckmann convince ambitious private and professional users even in their basic equipment. The innovative details such as a countersunk lashing bracket system, mechanically closed corner rungs and aluminium side walls characterise the rear tippers. The massive construction makes the backward tipper a long-lasting and stable companion in everyday work that masters every task. The 45 ° tilt angle also offers real added value and shows the performance of these vehicles.
