Böckmann BT-ST 3016/35 AS Plant

*** Call ***

Plus VAT

The Böckmann plant trailers are designed for the transport of mini and midi excavators as well as for transport of working and lifting platforms. This model is equipped with folding and width-adjustable drive-on rails for fast loading and unloading. The variable and high-efficient trailer of the professional class offers practical solutions for all challenges by the low loading height of 480 mm, a drive-up grid, a shovel storage, a practical positioning aid and adjustable support legs. A payload of up to 2730 kg is easily handled by the robust and durable construction. Fully resistant, reliable and economical!
