Bateson Bateson 72H Tipper

Â£ 2,285

Plus VAT

Model 72H is a tipping version of our 720, it is supplied standard with a ramp door and opening mesh extension sides. The trailer tips to the left hand side and not to the rear in order to retain the ramp door, which is very useful for loading machinery and even pushing a wheelbarrow up. The trailer is fully road legal with suspension, lights and high speed tyres for the maximum weight of 750kg. Off road it is suitable for use behind quad bikes and small tractors. It is also large enough to carry most quad bikes and ride on mowers. We consider its most common use to be for stables and landscape maintenance, although we are sure that there are few people who could not find a use for one. This trailer has been fitted with mesh sides and a front jockey wheel.

Width	1390	Length	3150
