With the tilting aluminium box trailer of the TL-ALK series you profit four times over; firstly from the low loading angle due to the lowered construction that is ideal for machines with a low ground clearance. Secondly from the many possible applications due to the interior length of 2515 mm - for transporting ride-on lawn mowers to small construction machines. Thirdly from the track-proven professional quality. And fourthly from the impressive design with the anodised aluminium superstructure.

Width	1830	Length	3730
Height	890
